

# Building a Culture of Sustainability

## About us

- Leading provider of Industrial Inspections, Certification, Training, Supplier audits, Cyber Security, Technical Staffing, Built Environment Services & Sustainability Services
- Operations in India (26 offices), SAARC, Central Asia
- Every 51 Kms QACA Engineer
- NABL approved Material Testing and Cyber Security Lab
- 2100 clients, 25% clients are Fortune top 100
- Leader in Telecom, Automotive, BE, Coal & Government sector
- Austrian, Global, NABCB Accreditations
- Quality Austria Excellence Training Center (QAEC)
- Quality Austria Excellence Design Center (QED)

## Understanding ESG

ESG stands for *Environmental, Social, and Governance*. It's a framework used to evaluate a company's sustainability and ethical impact, encompassing:

**Environmental:** A company's impact on the environment, including its carbon footprint, resource use, pollution, and waste management.

**Social:** A company's relationships with its employees, suppliers, customers, and the communities in which it operates. This includes factors like labor standards, human rights, diversity, and product safety.

**Governance:** A company's leadership, executive pay, audits, internal controls, and shareholder rights. It reflects how ethically and transparently a company is run.

ESG principles represent a holistic framework for sustainable business practices. ESG focuses on minimizing environmental impact, fostering social responsibility, and ensuring ethical governance, creating long-term value for all stakeholders. By embedding ESG into core strategies, organizations can drive resilience, attract responsible investments, and stay ahead in an evolving regulatory landscape.

## ESG Reporting

In today's landscape, businesses must demonstrate transparency and accountability through ESG reporting. In India, frameworks like the BRSR have become essential for listed companies, mandating detailed disclosures on sustainability practices and governance.

By adopting best practices and aligning with global standards such as TCFD, SASB, and CDP, companies can effectively communicate their ESG performance to stakeholders, investors, and regulators. Robust reporting not only fosters trust but also helps businesses attract responsible investments, meet compliance obligations, and maintain competitiveness in both domestic and international markets.

### Our Offerings:

- Build capacity for ESG reporting
- Train teams to align with best practices (BRSR, GRI, SASB, and TCFD)
- Validate your ESG programs/projects
- Evaluate existing ESG report: targeted support to investors and other stakeholders

Reporting  
Standards  
&  
Frameworks:

## ESG Assurance

ESG assurance refers to the independent verification of a company's ESG reporting and performance, ensuring the accuracy, reliability, and transparency of disclosed data.

In the Indian context, assurance is becoming increasingly critical as companies adhere to frameworks like BRSR and meet the expectations of investors, regulators, and stakeholders. Independent assurance not only strengthens stakeholder trust but also mitigates risks related to greenwashing and non-compliance.

As businesses aim to align with global best practices such as ISAE 3000 and AA1000, ESG assurance provides confidence that sustainability claims are credible, improving access to capital and enhancing reputation in domestic and international markets.

### Our Offerings:

- BRSR Report
- GRI Report
- CSRD Assurance
- TCFD Assurance
- Supply Chain Audit & Assurance
- Evaluation of LCA Studies
- Social Responsibility Assurance

## Our Sustainability (ESG) Services Portfolio

- GRI reporting
- BRSR reporting
- EcoVadis support
- CBAM verification
- ISO Standards & certification
- ESG assessment & validation
- Cross border ESG compliance
- Life Cycle Assessments (LCA)
- GHG verification & validation
- Enterprise ESG Strategy development
- Training on ISO and other ESG standards
- Capacity building towards global regulations
- ESG reporting using global frameworks (GRI, EUCSRD, TCFD )
- Capacity building for implementing various ESG frameworks

## ISO Standards & Certifications

Trainings, Capacity Building, Certification, Gap Assessment

### Environment

- ISO 14001 Environmental Management
- ISO 14044 Life Cycle Assessment
- ISO 14046 Water Footprint
- ISO 14065 Product Carbon Labelling
- ISO 50001 Energy Management
- ISO 14064 Greenhouse Gases
- ISO 14068 Carbon Neutrality
- LEED/ GRIHA

### Social

- ISO 26000 Social Responsibility
- ISO 45001 Occupational Health and Safety

### Governance

- ISO 20121 Sustainable Event Management
- ISO 32210 Sustainable Finance
- ISO 37001 Anti-bribery Management
